Known Issues

- After re-installation of the Editor, the Voice name may occasionally not appear on the Media Bay windows of Cubase. If this is the case, execute "Refresh" or "Rescan".
- The Mixing setup may not be recalled even if you store the current data of the Multi mode to a different Multi number then select the original Multi number again. To prevent such a situation, select another Multi number on the Editor, then select the original Multi number, or select the original Multi number directly from the S90 XS instrument again.
